

Technical drawing of a three-section folding door. The drawing shows the door in a partially open position, revealing the internal folding mechanism. The overall height of the door is 2400. The height of the top section is 1055, and the height of the middle section is 753.5. The height of the bottom section is 736.5. The width of the door is G. The drawing includes various dimensions for the door's components, such as the height of the top section (1055), the height of the middle section (753.5), and the height of the bottom section (736.5). It also shows the width of the door (G) and the height of the door's components (40, 5, 60, 60.5, 77).
